

ORGANIC MCLEOD'S AGRICULTURE SOIL CONDITIONER WITH NATURAL ZEOLITES

BENEFITS:

- A totally balanced organic fertiliser.
- A pH reading of 7.1
- Improvements in soil fertility by enhancing biological activity.
- Requires no further additives.
- Increased moisture infiltration and retention.
- Contains many strains of soil beneficial micro-organisms.
- Improves soil structure, texture and reduced wind and water erosion.
- Humus holds over 5 times its own weight in water, so less watering.
- Provides charged particles in plant available form.
- Microbes assist the plant to access nitrogen in natural form.
- Natural fertilisers are mainly non-leachable.
- Improves crop quality and resistance to pests and diseases.
- Very good humus organic matter content.

- Reduces the requirement of artificial fertilisers completely.
- Buffers the soil, protecting plants from high salt and pH levels.
- Provides food for further microbe activity and worm population.
- Regulating soil pH readings (by improving its buffering capacity).
- Very low aluminium and sodium content.
- Promotion of exceptional growth in plants.
- Increasing crop yields and quality.
- Reduction of growing time to harvest.
- Improves keeping quality and the shelf life of the products produced.
- Improvement to the protein and sugar levels.
- Microbes and enzymes improve soil vitality and production.
- Increases root mass and growth rate.
- Soil test recommended to establish application rate.

NUTRIENT ANALYSIS:

Nitrate Nitrogen (N)	85 ppm A
Ammonia Nitrogen	34 ppm A
Phosphorus (P)	97 ppm A
Potassium (K)	275 ppm H
Sulfate (S)	2.6 ppm A
Calcium (Ca)	1524 ppm A
Magnesium (Mg)	4.95 ppm A
Iron (Fe)	4.4 ppm A
Manganese (Mn)	146 ppm A
Boron (B)	21 ppm A
Copper (Cu)	16.4 ppm A
Zinc (Zn)	23.9 ppm A
Molybdenum (Mo)	2.46 ppm A
Cobalt (Co)	2.74 ppm A
Organic Matter	3.6% H

A = Adequate H = High

NEW! Liquid Soil Conditioner

- N-Fixing Biologicals reduces applied Nitrogen applications and costs
- Stimulates and feeds soil microbial and fungal growth
- Reduces Nitrogen leaching
